EDUCATION

Auburn University

Auburn, AL

Bachelor of Software Engineering

Expected May 2028

- **President** of Auburn's Association for Computing Machinery (ACM).
- **Placed 3rd** at ICPC 2025 University West Florida Regional.

EXPERIENCE

Software Engineer Intern

August 2025 – February 2026

Tennibot — Pioneering autonomous robotic solutions for racket sports

Auburn, AL

- Designed and implemented automated provisioning pipelines for autonomous robots, handling microSD flashing, filesystem configuration, and secure cloud registration; reduced manual setup time from hours to minutes.
- Built containerized Linux calibration pipelines (Ubuntu 22.04, Docker, RViz) to **improve sensor and camera accuracy by ~5%**, directly enhancing real-time perception reliability.
- Built end-to-end Python automation for video ingestion and dataset labeling using OpenCV and the CVAT SDK, **generating 10,000+ labeled images** and eliminating manual labeling workflows.

Data Analyst Intern

May 2025 – August 2025

Altec

Birmingham, AL

- Drove end-to-end **migration of 90+ dashboards** to Qlik Cloud, collaborating directly with clients to improve analytics reliability and insight longevity; Optimized SQL queries and data models, **reducing RAM usage by 32%** while preserving sub-second dashboard latency.
- Built custom JSON/CSS themes & integrated AI chatbot to automate dashboard workflows; Delivered client-facing analytics solutions to specification **50% ahead of schedule**, increasing stakeholder satisfaction and adoption.

Data Analyst Intern

May 2024 – August 2024

jHICA! (Hispanic and Immigrant Center of Alabama)

Homewood, AL

- Designed relational database schema consolidating **20+ years** of legacy data for scalable analytics.
- Developed interactive Tableau dashboards increasing operational visibility & enabling actionable community metrics.

PROJECTS

TecsPacs: Snippet & Packet Manager | *JavaScript, React, Node, Express, MongoDB, Auth0*

[GitHub](#)

- Designed a multi-surface developer platform (web app, CLI, VS Code extension) backed by shared REST APIs and centralized authentication, enabling consistent snippet management across environments.
- Implemented a secure Express/MongoDB backend supporting snippet storage, user identity, and AI-powered endpoints.
- Published a Node.js CLI to NPM and deployed the frontend on Vercel, enabling consistent workflows across browser, terminal, and IDE environments.

TaskFlow | *Java, JavaScript, Spring, Node.js, React, Tailwind, REST APIs, PostgreSQL, Vercel, Railway*

[GitHub](#)

- Built TaskFlow, a full-stack app with React, Spring Boot, and PostgreSQL for secure, per-user tasks.
- Deployed frontend on Vercel and backend on Railway using a cloud database.
- Delivered seamless CRUD workflows, JWT-secured APIs, and a clean, responsive UI with Tailwind CSS.

TECHNICAL SKILLS

Languages: Java, Python, SQL, JavaScript, TypeScript, Bash, HTML, CSS

Frameworks/Libraries: Spring, Node.js, Tailwind CSS, Express.js, React, Pandas

Databases: PostgreSQL, MongoDB, Snowflake

Tools & Systems: Git, Linux, Docker, Auth0, Railway, Vercel, CVAT, RViz, Viam, RESTful API Design

AWARDS & LEADERSHIP

Awards: **Placed 3rd** at ICPC 2025 University West Florida Regional, HSF Scholar, AP Scholar w/ Distinction, National Hispanic & African American Recognition, Placed 3rd TSA Robotics State, Alabama Data Scholar

Leadership: **President** of Auburn's Association for Computing Machinery (ACM), Hoover High **Robotics President**
- Led 50+ students, mentored peers, managed \$5K+ budget.
