EDUCATION

Auburn University

Bachelor of Software Engineering

Auburn, AL

Expected May 2028

- **President** of Auburn ACM and **Founder** of the Agentic Programming Club
- **Placed 3rd** at the 2025 ICPC University of West Florida Regional
- Undergraduate AI Research Fellow: Human-Computer Interaction
- Certificate in Artificial Intelligence Engineering

EXPERIENCE

Software Engineering Intern

August 2026 – Present

OCV, LLC

Opelika, AL

- Authored production-ready JSON configurations for 50+ custom iOS and Android applications by translating client requirements into feature layouts, content, and application behavior for native Swift and Kotlin generation.
- Validated 300+ new and rebuilt applications across iOS TestFlight and Android APK environments, identifying and resolving hundreds of functional defects, client-requested changes, and release blockers through multi-team QA cycles.
- Shipped 100+ iOS and Android releases and re-releases by managing App Store Connect and Google Play submission workflows, verifying store configurations, and guiding builds through platform review.

Software Engineering Intern

August 2025 – December 2025

Tennibot

Auburn, AL

- Automated Linux provisioning for autonomous robots, covering microSD imaging, filesystem setup, and secure cloud registration, reducing manual setup from multi-hour work to a repeatable minute-scale workflow.
- Built Dockerized Ubuntu 22.04 calibration workflows with RViz and robot sensor scripts to make camera and rotation calibration reproducible across deployments.
- Developed Python, OpenCV, and CVAT SDK data pipelines to extract video frames, upload datasets, and support annotation of 10,000+ training images for perception model development.

Data Analyst Intern

May 2025 – August 2025

Altec

Birmingham, AL

- Migrated 90+ Qlik analytics assets to Qlik Cloud, optimizing Qlik and SQL models across 13M+ rows to cut memory use 32%, maintain sub-second dashboards, and standardize analytics with JSON/CSS themes.

Data Analyst Intern

May 2024 – August 2024

iHICA! (Hispanic and Immigrant Center of Alabama)

Homewood, AL

- Designed normalized relational database schema consolidating 20+ years of legacy program data into a scalable reporting foundation.

PROJECTS

Published Mobile Apps | *React Native, Expo, TypeScript, Node.js, PostgreSQL, Supabase, Express.js* May 2026 - August 2026

- Independently designed, built, and launched full-stack applications across iOS and web, including EventFilm, a shared event-photo platform with link-based guest uploads and subscriptions, and Auburn Market, a verified student marketplace for item sales, housing, messaging, search, and moderation.

Prediction Market Intelligence Platform | *TypeScript, Next.js, Prisma, PostgreSQL, Kalshi API, Vitest*

June 2026

- Engineered a Kalshi market research platform with order book normalization, execution-signal analysis, 240+ tests, and 50,000-snapshot simulations that identified low fillability as the primary constraint on paper edges.

EXTRACURRICULAR ACTIVITIES

ACM: Agentic Programming Club Founder and President | *Auburn University*

- Trained 20+ students in the effective and efficient use of AI-powered agentic coding tools to build portfolio projects and prepare for software engineering careers.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, TypeScript, C++ , x86 Assembly, SQL, Bash

Frameworks/Libraries: React Native, Expo, Next.js, React, Node.js, Express, Spring, Pandas, OpenCV, Tailwind, Vitest

Data and Systems: PostgreSQL, MongoDB, Snowflake, Prisma, Docker, Linux, REST APIs, Kalshi API

Developer Tools: Git, Expo EAS, RevenueCat, CVAT, RViz, Viam, Supabase, Firebase, Vercel, Railway
